

Order form Support

Support is given up to a reasonable level, up to our judgment; we will give you advice how to do calculations, some limited looking for errors in input files, and explain options if they are not clear. The price for a year support, directly following a previous support year, is 1000 euro. The price for a year support, not directly following a previous support year, is 2000 euro. The client is responsible for yearly updating this support contract, if needed.

Typically building complete numerical models and programming new options is not part of this support; if you need this a dedicated contract is needed.

1. Read this complete order form.
2. Fill in, scan and email the form to us.
3. We will send the invoice.
4. Send the payment to our bank account.

Bank

Transfer of payment should be made by wire transfer. Do not send a money check.
